

**MALTEPE UNIVERSITY, DEPARTMENT OF SOFTWARE ENGINEERING**

**SE356 WEB APPLICATION DEVELOPMENT LAB MANUAL**

**Assignment 03:** Formatting the e-commerce web site using CSS-part II

**Due Time:** end of practical session.

**Details:**

In this assignment, you are continuing to format your e-commerce web site that you start on the first week. You need to use CSS for changing styles of website elements.

**Step 1:** In order to move your project to Visual Studio, create an Asp.Net C# web application then copy and paste your previous work.

**Step 2:** Modify your CSS file

1. Add border line for menu li elements with proper border radius
2. Wrap text around an Image/Logo in content of *About Us* page.
3. Define a style rule to overlay a title over an image then apply this rule to the image in your *About Us* page
4. Apply rules for each link property of menu items in the css file for: *a:link*, *a:visited*, *a:hover*, *a:active*.
5. Use *transform* property in your banner/menu/anywhere you want.

**Step 3:** Add some valuable content to your website (all images and text should be related with your project)

**Note:** Your work is examined and reviewed on the last 10-15 minutes and your scores will be published via Blackboard System.
